Insights_Uhde

With over 260 companies and 70,000 employees, the Rhine area is one of the leading regions for chemistry in Europe. Steel, refineries, chemical plants and plastics production are strongly represented here. thyssenkrupp Uhde Engineering Services (tkUES) has also had important customers here for decades, such as Shell, Lyondellbasell, Stepan, Vestolit, Vinnolit and Lanxess.

News | 01.01.2020 | Cologne, Germany

New engineering office in Cologne, Germany

With over 260 companies and 70,000 employees, the Rhine area is one of the leading regions for chemistry in Europe. Steel, refineries, chemical plants and plastics production are strongly represented here. thyssenkrupp Uhde Engineering Services (tkUES) has also had important customers here for decades, such as Shell, Lyondellbasell, Stepan, Vestolit, Vinnolit and Lanxess.

In order to establish an even closer customer relationship and to be able to serve our customers even faster, tkUES opened its own engineering office for petrochemicals and refinery engineering on January 1, 2020 in Cologne (Colonus Carré - Subbelrather Str.15a, 50823 Cologne), in which project managers,

electrical engineers, layout experts and project engineers work. This is not only more cost-effective because the colleagues are from the region and therefore there is no need to send them to the Rhineland, the routes to the customer are also short and response times are faster.

Boost your competitiveness with our [360° Service Solutions](#).
